MOHAMED HASSAN

Frontend-Focused Full Stack Developer

+201124080446 • z2661737@gmail.com • linkedin.com/in/mohamed-hassan-8080102a2 • Cairo

Summary

Web developer with **2 years** of hands-on experience working on real production products, focused on building **stable** and **maintainable** frontend solutions.
Handled frontend delivery from **UI implementation to backend integration** using **REST APIs,** dealing with real issues related to performance, data usage, and user behavior. **Clear structure** reduced rework and allowed new features to be added safely without breaking existing functionality.
Work with ownership and **team awareness**, choosing simple solutions that support predictable delivery and long-term product stability.

Experience

Khawarizm – Digital Solutions — Cairo, Egypt

Co-Founder & Full-Stack Web Developer — 02/2024 - Present

Digital Solutions

- **I co-founded Khawarizm with the conviction that most web project issues originate before development begins—primarily from unclear requirements and insufficient technical planning.**
- In our first project, I led **requirements analysis**, translating high-level business ideas into a clear **technical scope** and **system architecture**. This early alignment reduced rework by **30–40%** and kept delivery within **8 weeks**, preventing prolonged iteration cycles.
- Across **10+ client projects**, I served as the primary point of contact, aligning business expectations with **technical feasibility**.
- When frequent **scope changes** threatened delivery timelines—such as in a restaurant platform—I introduced short, structured **milestones**, assessing each request for **time, impact, and architectural risk**.
- As a result, projects were delivered on schedule without compromising **performance** or **core system stability**.
- In **content-driven platforms**, I focused on building **scalable content architecture**.
- For a handcrafted carpet company website, content volume **doubled within 6 months** without requiring restructuring, significantly reducing long-term **maintenance costs**.
- I led the end-to-end design and development of Khawarizm's website with a clear objective: conversion, not visuals. of Khawarizm's website with a clear objective: conversion, not visuals.
- By prioritizing performance optimization and user experience, the site became an active lead generation channel within 3 months of launch.
- A major technical challenge emerged with a **university platform** that evolved from an informational website into a system resembling an **LMS**.
- Over **6–9 months**, the platform expanded to **10+ sections** and supported **multiple user roles**.
- Thanks to early decisions around **modular architecture** and **role-based access control**, the system scaled smoothly, with new features deployed without **meaningful downtime**.
- I frequently worked with **legacy codebases**, favoring **incremental refactoring** over full rewrites.
- This approach improved **maintainability**, reduced feature delivery time by **20–30%**, and enabled new developers to onboard quickly.
- In more than **70% of projects**, scope evolved during development.
- Rather than resisting change, I treated it as part of the **process—evaluating** each request based on delivery impact, system stability, and **long-term scalability**.

Skills

Frontend:
JavaScript (ES6+), TypeScript · React.js · Functional Components · Hooks · State Management · Redux · Redux Toolkit · Context · Zustand · HTML5 · CSS3 · Responsive Design · Cross-browser Compatibility

Backend / APIs: Backend / APIs · API Integration · Fetching · Error Handling · Loading States · NestJS (advanced), Next.js

UI / Styling Libraries: Tailwind CSS · Material UI · Bootstrap

Databases & ORMs: PostgreSQL, MySQL · Prisma, TypeORM

Tools & Dev Practices:
Git · GitHub · GitLab · Agile · Scrum · Debugging · Chrome DevTools · Docker · CI/CD · GitHub Actions · GitLab CI · Deployment · Vercel · Netlify · Serverless Basics · AWS

Testing: Jest, React Testing Library

Soft Skills: Problem Solving · Clean Code · Communication · Ownership · Fast Learner
